agents because the men are actually involved in health extension package now and information.

And finally, they're reporting increased family planning users. They've actually reported that in 2008 when the project started, the

a priority from the donor also, allocating enough funds but also asking for the right information. And so that requires some education of donors as well.

And finally, from my interviews and all of the research that I did and also the work that I was doing in Ethiopia I have created a list of my recommendations. Once again, capacity building, but I do think that we need to be
